

High Studies in Ephemeral Architecture

Ephemeral Architecture

▲ EPHEMERAL ARCHITECTURE

An Advanced Technician in Ephemeral Architecture focuses on designing stands and structures for trade fairs, exhibitions, congresses, television sets and theatre and musical stages.

In addition they can work on the installation of kiosks, marquees, stalls, parades, prefab collapsible constructions, lightweight structures, signposting, window dressing sets, etc...

I'm going to work as

- An employee for companies in the construction and show business.
- A technician creating and building scenographies and light structures.
- A window dresser.
- A stage and set designer.
- A CAD 2D draftsman and a 3D infographics designer.
