The High Studies in Artistic Ceramics aims to prepare professionals with a wide range of technical, artistic and cultural knowledge and skills that will enable them to carry out their work in the ceramics industry whether it is as independent artists, as craftsmen or as employees for larger companies, necessarily involving the capacity to control, coordinate and organize the whole ceramic process.

Professionals of this level will carry out their activity in factories, ateliers or workshops, public or private, and in small, medium or large companies related to the specific field of Artistic Ceramics.
