

High Studies in Photography

Photography

▲ PHOTOGRAPHY

High Studies in Photography aims to prepare professionals who are able to create, register and translate aesthetic events. The course content includes both the technical and expressive aspects of visual language, enabling the development of professional photographic skills with technical and scientific accuracy, while emphasizing creativity and focusing on the purpose to be fulfilled by the photographic product or assignment.

The objective of these studies is to fulfill the needs and requirements constantly demanded by society in this professional field.

I'm going to work as

- A creative photography freelancer
- A photojournalist
- An advertising and commercial photographer
- A fashion photographer
- A photo lab technician
- A photograph archivist technician
